Summary

I hold a Master's degree in Computer Applications (MCA) from Chandigarh University and a Bachelor's degree in Computer Applications (BCA) from Veer Bahadur Singh Purvanchal University. With 4.5 years of professional experience, I am currently working as a Software Development Engineer in Test (SDET). As a skilled SDET, I have expertise in Android Software Engineering and Software Quality Assurance in the retail and cosmetics sectors. My technical proficiency spans Android SDK, Kotlin App Development, Native Mobile App Testing, Non-functional Testing, Software Testing Life Cycle (STLC), and Regression Testing. I am well-versed in application development and testing concepts, including SDLC, STLC, Test Design, Defect Management, Multi-device Testing, Multi-software Environment Testing, Test Management, Manual Testing, and Documentation. I have a solid understanding of Agile and Classic Project Methodologies. My hands-on experience includes various testing types, such as Regression Testing, Exploratory Testing, Sanity Testing, Ad-hoc Testing, Functional Testing, UI/UX Testing, and Smoke Testing. I excel in preparing Test Plans, Test Summaries, and Traceability Matrices. I have conducted browser compatibility testing on platforms like Google Chrome, Firefox, Internet Explorer, and Microsoft Edge, as well as device testing (Mobile and Desktop) across Web, Android, and iOS platforms. Additionally, I am proficient in Project Management Tools like TFS, Jira, and Trello, especially for Payment Application projects. My technical toolkit includes Defect/Bug Tracking Tools (TFS, Jira, and Excel), API Testing Tools like Postman, and programming languages such as C, C++, Java, SQL, and MySQL. Fluent in both English and Hindi, I have a professional interest in Software Testing, Quality Assurance, and Project Management. If you wish to connect or collaborate, feel free to contact me at abdul.talib.75180@gmail.com

Experience

BugWizard AI

Founder & CEO

February 2025 - Present (1 year 5 months)

Varanasi

BugWizard AI is a power-user QA platform that automates bug creation, retest reporting, duplicate detection, evidence handling, and QA intelligence inside Azure DevOps & Atlassian JIRA — powered by multi-provider AI, voice-to-text input, and a deeply engineered workflow

Zoonie Tod TV

Founder & Kids Content Producer

November 2025 - Present (8 months)

India

Welcome to Zoonie Tod TV, where we turn everyday routines into magical adventures for toddlers and preschoolers! Our channel features high-quality, Pixar-style 3D animation designed to engage young minds while teaching essential life skills.

What to Expect

Healthy Habits: We make brushing teeth, washing hands, and eating nutritious snacks fun through catchy songs.

Daily Routines: Follow along with our "Fun Morning Routine" to start every day with a smile and a song.

Social & Emotional Learning: We celebrate kindness, helping others, and being a "good kid" in every episode.

Learning Through Play: Explore shapes, colors, and more with our interactive nursery rhymes and bubble-filled adventures.

Meet Our Mascot

Led by our friendly purple monster and a cast of adorable toddlers, Zoonie Tod TV is a safe and vibrant space for children to grow and learn.

New Videos Every Week! Subscribe to join our community and never miss a beat of the "Brush, Scrub, and Shine" fun.

Software Quality Engineer

(SDET & AI Product Developer)

October 2025 - Present (9 months)

India

Systems Engineer
(Automation Engineer at PepsiCo)
March 2025 - October 2025 (8 months)

Project Title: MFG Pro+

Client: PepsiCo

Role: Software Development Engineer in Test (SDET)

Project Description:

MFG Pro+ is an advanced Supply Chain Lead Management System developed for PepsiCo to streamline and digitize operations across various manufacturing roles. The system consists of a comprehensive web portal tailored for Supply Chain Leads, and a native iOS mobile application (compatible with both iPad and iPhone) designed for on-ground operators and staff's working and tasks.

Responsibilities:

As an SDET on the project, I am responsible for:

End-to-end testing of user workflows for all personas across the platform

Functional testing of web and iOS applications to ensure reliability and performance

Identifying and reporting bugs or inconsistencies in user experience

Collaborating with developers and product managers to maintain high-quality standards

Automating repetitive test cases where applicable to improve efficiency.

Recently transitioned to Automation Testing, leveraging:

Robot Framework for keyword-driven test automation

Python for writing custom test libraries and scripts

Selenium for web-based automation

Developing and maintaining automated test suites to improve test coverage and reduce manual efforts

Identifying, logging, and tracking defects to closure in collaboration with the dev team

This role involves a deep understanding of both manual and automated testing techniques to ensure a reliable and scalable product for PepsiCo's manufacturing environment.

Systems Engineer (SDET @PEPIRiS by PepsiCo)

July 2024 - March 2025 (9 months)

Block B, Sector 132, Noida, Uttar Pradesh 201304

Building PEPIRiS Android & iOS for

(Saudi Arabia || Mexico || Turkey || Australia || North America – Walmart & 7-Eleven {Snacks and Beverage})

:

As a Software Application Developer specializing in Android and iOS platforms for PepIRIS by PepsiCo, I've to ensure the functionality, reliability, and stability of our mobile applications. I work closely with our development team to identify and address issues, optimize performance, and deliver a superior user experience.

R:

- Testing the stability & performance of ML models of PEPIRiS's through the Standalone app as well as with the Accenture's PACE Integrated App..
- Performing the report testing and creating the Manual KPI's through calculation and matching the results with the KPI's showing in the Mobile App as well as in the backend report.
- Conduct thorough testing of PepIRiS's Android mobile apps to identify bugs, performance issues, and usability concerns.
- Develop and execute test plans, test cases, and test scenarios to validate app functionality across different devices, screen sizes, and operating system versions.
- Collaborate with UI/UX designers & developers to troubleshoot and resolve issues, ensuring quick turnaround times for bug fixes and enhancements.

- Utilize automated testing tools and frameworks to streamline testing processes and improve test coverage.
- Perform regression testing to verify the impact of software changes and updates on app stability and performance.
- Provide detailed reports and documentation on test results, defects, and recommendations for improvement.
- Using Generative AI & Prompt Engineering, creating high quality Test Cases.
- Creating test scenario & test cases of Admin Panel.

Senior Systems Associate

Senior Systems Associate

(Application Developer)

June 2023 - March 2024 (10 months)

India

:

1. Collaborated with cross-functional teams to design and implement visually appealing and intuitive user interfaces for Ulta beauty Android application.
2. Worked closely with UI/UX designers to translate design wireframes created in Invision and Figma into a seamless and engaging user experience, paying attention to both functionality and aesthetics.
3. Implemented APIs to ensure seamless data flow and synchronization between the frontend and backend components.
4. Using Jetpack compose to create high quality user interface as per the client's requirement and designs created by UI/UX designers.
5. Worked on the frontend of the Cart screen, Checkout screen and All categories screen
6. Conducted several thorough unit testing of applications to identify and address bugs, performance issues, and ensure a smooth user experience across various devices before sending it to tester.
7. Worked on headless CMS - Amplience, which is a content management system that works with any .front-end tool which makes it easier to change the contents like images, heading, titles, videos etc. without deploying different version of the app.
8. Participated in code reviews to ensure code quality, best practices, and adherence to coding standards.
9. Collaborated with cross-functional teams, including product managers, designers, and backend developers, to deliver high-quality software solutions.
10. Stay abreast of the latest industry trends, Android updates, and emerging technologies to continuously improve skills and contribute to the overall technical excellence of the team.

Systems Associate

(SDET at Ulta Beauty)

February 2023 - June 2023 (5 months)

Jaipur, Rajasthan, India

[Client : .]

:

1. Developed and executed detailed, comprehensive, and well-structured test plans and test cases based on product requirements and user stories.
2. Conducted thorough manual testing of our native mobile applications on iOS and Android platforms to identify bugs, glitches, and usability issues.
3. Evaluated user interfaces for consistency and functionality, ensuring they adhere to design guidelines and provide an excellent user experience.
4. Logged defects in a clear and concise manner in the defect tracking system, providing detailed descriptions and steps to reproduce, along with severity and priority levels.
5. Performed regression testing to verify that fixed bugs have been resolved and have not introduced new issues.
6. Worked closely with the development team to communicate issues found and verify the implementation of solutions.
7. Tested the application's performance under various conditions, including load, stress, and scalability tests.
8. Applies expertise in AI tools to enhance the professionalism of test scenario creation.
9. Possesses expertise in the retail domain, specializing in manual end-to-end regression, smoke testing, UI testing, story, and integration testing.
10. Used the tools of project management like JIRA, Confluence etc.

Operations Executive

(Quality Assurance Engineer)

March 2022 - June 2023 (1 year 4 months)

Jaipur, Rajasthan, India

At Infosys , I'm working as a Software Development Engineer in Test.

I have to work on these technologies

Java, DBMS, HTML5, Agile , DevOps, Jenkins, Selenium, JUnit, TestNG.

[Client : .]

In the project I'm using Appium Framework, JMeter, IntelliJ IDE, SOAP UI, POSTMAN, SAP , Jenkins , Dyn Admin , Cyber source , Uber all , BCC , Qubit , Perfecto , ADA Testing , Amplience (CMS Dynamic Content) etc.

Also Team & Project Management Tools : JIRA , Confluence & Bitbucket by Atlassian

Operations Executive Trainee

December 2021 - March 2022 (4 months)

Mysore, Karnataka, India

During this Apprenticeship program at Infosys as a Trainee I was learning and working on these technologies and softwares
